**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Response to Amendment***

1. This action is in response to the amendment filed 06 September 2002 that amended claims 1 and 120.

***Response to Arguments***

2. Applicant's arguments filed 06 September 2002 have been fully considered but they are not persuasive. Applicant argues that Kurihara does not show different data components being encrypted with different keys. Kurihara's teaching of an encrypted scrambling key meets this limitation. In this example, the scrambling key is a first component, and any other data, such as video, audio, or sub-audio, is a second component.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 4-7 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Although encrypting a multiplexed transport stream packet is disclosed (at least) in the claims as originally filed and encrypting components of a transport stream with keys that correspond to the

component is disclosed in figure 2, there is no support for the two encryptions being jointly performed.

***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

5. Claims 1, 3-7, 120, 121 are rejected under 35 U.S.C. 102(e) as being anticipated by Kurihara (6069956).

Element 21 of figure 2 anticipates the first part of the first clause of claim 1. Lines 63-64 of column 7 anticipate periodic scramble key updates. Lines 19-26 of column 16 anticipate scramble means.

With respect to claim 120, lines 28-29 of column 10 show an enciphered scramble key. The scramble key reads on a component. Element 16 anticipates claims 121 and 122. See figure 16 for claims 4-7. As taught in lines 14-22 of column 7, audio,

video, and the like are multiplexed. "And the like" includes sub-audio. ECM data is also multiplexed, which reads on private data. This meets the limitations of claim 3.

**Conclusion**

6. This application contains claims 8-119 drawn to an invention nonelected with traverse in Paper No. 6. A complete reply to the final rejection must include cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.
